23 Fuel processing, fuel injection	Page
Servicing fuel injection system	23– 1
– Rules for cleanliness when working on fuel injection system	23– 7
– Removing and installing injection pump	23– 8
– Checking and adjusting static injection pump timing	23–13
– Load-dependent injection pump timing	23–18
– Checking engine timing	23–19
– Sealing connection fitting of injection pump	23–21
– Adjusting idling and maximum engine speed (unloaded)	23–22
– Injection pump with idle speed boost	23–26
– Altitude pressure compensator	23–32
– Removing and installing injectors	23–34
– Servicing injectors	23–36
– Checking injectors for undamaged pintle, ejection pressure and leaks	23–38
– Fuel filter preheating	23–41
– Retrofitting fuel filter preheating	23–42
Servicing Bosch fuel injection pump	23–45
– Injection pump with load shock absorber	23–49
– Replacing return spring for control lever of injection pump	23–51
– Removing and installing control lever or return spring	23–53

23 Fuel processing, fuel injection	Page
– Replacing control lever bearing bush in pump cover, pump cover gasket and O-ring for control lever	23–57
– Replacing O-ring for fuel delivery adjusting screw	23–62
– Replacing O-ring of idle speed boost shaft	23–63
– Replacing O-ring on injection timing cover	23–64
– Replacing sealing or O-ring for CSA lever/cover	23–65

28 Glow plug system	Page
Checking glow plug system	28– 1
– Testing current consumption of glow plugs	28– 1
– Testing glow plugs	28– 2
– Glow plugs with burnt electrodes	28– 4
