| 1.1       | Safety precautions                                                               | 1         |
| 1.2       | Rules for cleanliness when working on the injection system                       | 2         |
| 1.3       | Procedure before opening high-pressure section of injection system               | 2         |
| 1.4       | Test data                                                                        | 5         |
| 1.5       | Overview of fitting locations                                                    | 5         |
| 1.6       | Air cleaner - exploded view                                                      | 15        |
| 1.7       | Removing and installing air filter element                                       | 16        |
| 1.8       | Removing and installing air cleaner housing                                      | 17        |
| 1.9       | Removing and installing intake air temperature sender G42 and air mass meter G70 | 20        |
| 1.10      | Intake manifold - exploded view                                                  | 20        |
| 1.11      | Removing and installing throttle valve module J338                               | 22        |
| 1.12      | Checking vacuum unit for intake manifold flaps                                   | 22        |
| 1.13      | Removing and installing vacuum unit for intake manifold flaps                    | 24        |
| 1.14      | Checking for leaks in vacuum reservoir in intake manifold                        | 24        |
| 1.15      | Removing and installing intake manifold                                          | 25        |
| 1.16      | Fuel rail and injectors - exploded view                                          | 28        |
| 1.17      | Removing and installing fuel rail and injectors for cylinders 2, 4, 6            | 32        |
| 1.18      | Removing and installing fuel rail and injectors for cylinders 1, 3, 5            | 35        |
| 1.19      | Renewing combustion chamber ring seal and support ring for injector              | 38        |
| 1.20      | High-pressure pump - exploded view                                               | 40        |
| 1.21      | Checking fuel pressure and residual pressure (up to high-pressure pump)          | 42        |
| 1.22      | Removing and installing high-pressure pump                                       | 45        |
| 1.23      | Wiring and component check with test box V.A.G 1598/42                           | 46        |
| 1.24      | Removing and installing engine control unit J623                                 | 48        |
| 1.25      | Removing and installing Lambda probes                                            | 51        |
| <b>28</b> | <b>Ignition system</b>                                                           | <b>53</b> |
| 1         | <b>Servicing ignition system</b>                                                 | <b>53</b> |
| 1.1       | Safety precautions                                                               | 53        |
| 1.2       | Test data                                                                        | 53        |
| 1.3       | Ignition system - exploded view                                                  | 54        |
| 1.4       | Removing and installing ignition coils                                           | 55        |
| 1.5       | Removing and installing knock sensors G61 / G66                                  | 57        |
| 1.6       | Removing and installing engine speed sender G28                                  | 58        |
