

Contents

1	Safety briefing/employee qualification	1
1.1	Qualification	1
2	Safety information	2
2.1	Safety information	2
2.2	Safety precautions when working on the cooling system	4
2.3	Safety precautions when using testers and measuring instruments during a road test	5
2.4	High-voltage components / electric vehicles	5
3	Repair instructions	6
3.1	Information on handling fine dust, aluminium dust and steel dust	6
3.2	Bonding surfaces for self-adhesive components	7
3.3	Secure threaded connections	7
3.4	Identification plates	7
3.5	Impact wrenches	7
3.6	Multi-material mix	8
3.7	Extraction systems for steel/aluminium body repair station ("multi-material-mix" workplace)	8
3.8	Battery, power supply	9
3.9	Air conditioning system / refrigerant	9
3.10	Electronic control units	10
4	General notes on body repairs	11
4.1	Original joint	11
4.2	Galvanised body parts	11
4.3	Removing remaining material	11
4.4	New parts	11
4.5	Moulded foam inserts	11
5	Explanation of symbols	13
5.1	Symbols relating to procedures for separating components	13
5.2	Symbols relating to welding, brazing and soldering	13
5.3	Symbols relating to rivets	14
5.4	Symbols relating to preparation	15
5.5	Symbols relating to corrosion protection	16
6	Vehicle body construction features	18
6.1	Body structures	18
7	Assessing damage	19
7.1	General notes	19
7.2	Checking weld seams and aluminium node castings	19
7.3	Load paths	19
7.4	Measuring procedures / damage diagnosis	22
7.5	Overview of materials used	23
7.6	Passive safety	28
8	Thermal joining techniques	32
8.1	Resistance spot welding (RP)	32
8.2	Shielded arc plug welding (SG plug welding)	33
8.3	SG continuous seams and stitch weld seams	34
8.4	MIG soldering/brazing	35
8.5	Aluminium welding	35
8.6	Laser welding	36
8.7	Laser soldering/brazing	37
8.8	Replacement joining techniques in repair work (steel)	37
8.9	Replacement joining techniques in repair work (aluminium)	37
9	Processing body structure adhesive D 180 004 M2	39
9.1	Preparing bonding surfaces	40

10	Cold joining techniques	53
10.1	Rivets	53
10.2	Flow-drill screws (FDS)	59
10.3	Clinching	61
11	Separating techniques in body welding; areas of application	63
11.1	Drilling	63
11.2	Saw-cutting	63
11.3	Grinding	63
11.4	Milling	63
12	Surface repairs	65
12.1	Dent removal techniques for sheet steel	65
12.2	Dent removal procedures for aluminium panels	66
12.3	Processing metal and aluminium filler	67
12.4	Processing unleaded tin	68
12.5	Definition of "accurately aligned surface" / handover to paint shop	68
13	Performing straightening work on body structure	69
13.1	Straightening	69
13.2	Separating cuts	69
13.3	Body sub-parts and part sections	69
14	Corrosion protection	70
14.1	Corrosion protection for attachments and welded parts	70
14.2	Cavity sealing agent	70
15	Plastic repairs	72
15.1	Repairing dents	72
15.2	Repairing scratches	73
15.3	Repairing cracks and tears (up to a length of 100 mm)	74
15.4	Repairing holes (up to 30 mm diameter)	75
15.5	Plastic repairs (glass fibre materials)	77
16	Glass repairs	81
16.1	Repairing windscreens	81
16.2	Special tools, workshop equipment, testers, measuring instruments and other items required	85
16.3	Description of repair work	87
17	Thread repairs	92
17.1	Thread repairs for safety-related components	92
17.2	Repairing threads for attachment of subframe	92
17.3	Helicoil plus Twinert	99
