82 - Supplementary heating	1
1 Hydronic D5WS auxiliary coolant heater	1
1.1 General information	1
1.2 Safety precautions	1
1.3 Rules for cleanliness and important notes	2
1.4 General notes	3
1.5 Overview of fitting locations – Hydronic D5WS auxiliary coolant heater	3
1.6 Assembly overview – Hydronic D5WS auxiliary coolant heater	4
1.7 Notes on operation of Hydronic D5WS auxiliary coolant heater	4
1.8 Control and safety devices of Hydronic D5WS auxiliary coolant heater	5
1.9 Technical data of Hydronic D5WS auxiliary coolant heater	6
1.10 Type and configuration of the Hydronic D5WS auxiliary coolant heater	8
1.11 Technical data of the coolant circulation pump V50	9
2 Pre-selection clock E111 of Hydronic D5WS auxiliary coolant heater	10
2.1 Operation and function of pre-selection clock E111	10
2.2 Setting, activating and deactivating pre-selected times	12
2.3 Removing and installing pre-selection clock E111	13
2.4 Diagnosis functions of the pre-selection clock E111	14
2.5 Reading event memory using pre-selection clock E111	14
2.6 Table of fault codes in event memory (fault codes 000-050)	15
2.7 Table of fault codes in event memory (fault codes 051-091)	19
2.8 Unlocking control unit and clearing event memory	22
3 Maintenance work on Hydronic D5WS auxiliary coolant heater	23
3.1 Safety precautions	23
3.2 General information	24
3.3 Assembly overview - heater unit of Hydronic D5WS auxiliary coolant heater	24
3.4 Removing and installing heater unit with bracket	27
3.5 Removing and installing heater unit bracket	29
3.6 Removing and installing seal (sealing foil)	30
3.7 Removing and installing exhaust pipe	31
3.8 Removing and installing blower cover	31
3.9 Removing and installing housing cover	32
3.10 Removing and installing auxiliary heater control unit J364	33
3.11 Removing and installing glow plug for heater Q9	34
3.12 Removing and installing fuel connection	36
3.13 Removing and installing flame monitor G64	37
3.14 Checking flame monitor G64	40
3.15 Removing and installing coolant temperature sender for heater G241 and overheating sensor G189 (combination sensor)	40
3.16 Checking coolant temperature sender for heater G241 and overheating sensor G189	41
3.17 Removing and installing combustion air blower V6	42
3.18 Checking rotation speed of combustion air blower V6	44
3.19 Removing and installing flame protection mesh	44
3.20 Removing and installing combustion chamber	45
3.21 Removing and installing heat exchanger	47
3.22 Removing and installing remote control receiver for auxiliary coolant heater R149	48
4 Coolant circuit with auxiliary/supplementary heater	49
4.1 Coolant hose schematic diagram	49
5 Fuel supply to Hydronic D5WS auxiliary coolant heater	57
5.1 Safety precautions	57
5.2 Rules for cleanliness	57
5.3 Assembly overview - fuel take-off	57

5.4	Removing and installing metering pump V54 for Hydronic D5WS	58
5.5	Removing and installing strainer of metering pump V54	59
5.6	Prerequisites for checking/measuring fuel delivery rate	60
5.7	Checking/measuring fuel delivery rate of Hydronic and »D5WS« auxiliary coolant heater	60
6	Auxiliary air heaters Airtronic D2 and D4S	62
6.1	General information	62
6.2	Safety precautions	62
6.3	Rules for cleanliness	63
6.4	Overview of auxiliary air heaters installed in vehicle	63
6.5	Working principles of Airtronic auxiliary air heaters D2 and D4S	65
6.6	Control and safety devices of auxiliary air heaters Airtronic D2 and D4S	66
6.7	Fitting location and principle of operation of Airtronic D2 auxiliary air heater	67
6.8	Fitting location and principle of operation of Airtronic D4S auxiliary air heater	69
6.9	Technical data of Airtronic D2 auxiliary air heater	70
6.10	Technical data of Airtronic D4S auxiliary air heater	72
6.11	Type and version of auxiliary air heaters Airtronic D2 and D4S	74
6.12	Synchronising remote control	78
6.13	Setting or changing operating time of auxiliary heater	79
6.14	Using remote control	80
7	Pre-selection clock E111 with temperature regulator on auxiliary air heaters Airtronic D2 and D4S, ►05.2010	81
7.1	General information	81
7.2	Operation and function of pre-selection clock E111 with temperature regulator	81
7.3	Setting, activating and deactivating pre-selected times, pre-selection clock E111 with temperature regulator	83
7.4	Removing and installing pre-selection clock E111 with temperature regulator	84
7.5	Pin assignment on rear of pre-selection clock E111 with temperature regulator	85
7.6	Diagnosis functions of the pre-selection clock E111	86
7.7	Reading event memory using pre-selection clock E111	86
7.8	Table of fault codes in event memory of auxiliary air heaters Airtronic D2 and D4S (fault codes 000-050)	87
7.9	Table of fault codes in event memory of auxiliary air heaters Airtronic D2 and D4S (fault codes 051-097)	90
7.10	Unlocking control unit and clearing event memory	93
8	Pre-selection clock E111 with temperature regulator on auxiliary air heaters Airtronic D2 and D4S, 05.2010 ►	95
8.1	General information	95
8.2	Operation and function of pre-selection clock E111 with temperature regulator	95
8.3	Setting, activating and deactivating pre-selected times, pre-selection clock E111 with temperature regulator	97
8.4	Removing and installing pre-selection clock E111 with temperature regulator	98
8.5	Pin assignment on rear of pre-selection clock E111 with temperature regulator	99
8.6	Diagnosis functions of the pre-selection clock E111	100
8.7	Reading event memory using pre-selection clock E111	100
8.8	Table of fault codes in event memory of auxiliary air heaters Airtronic D2 and D4S (fault codes 000-050)	101
8.9	Table of fault codes in event memory of auxiliary air heaters Airtronic D2 and D4S (fault codes 051-099)	105
8.10	Unlocking control unit and clearing event memory	108
9	Maintenance work on auxiliary air heaters Airtronic D2 and D4S	111
9.1	Safety precautions	111
9.2	General information	112
9.3	Assembly overview - heater unit of Airtronic D2 auxiliary air heater	112
9.4	Assembly overview - heater unit of Airtronic D4S auxiliary air heater	114
9.5	Overview of available versions of combustion air blower V6	115
9.6	Removing and installing heater unit of Airtronic D2 auxiliary air heater	115

9.7	Removing and installing housing with heater unit of Airtronic D4S auxiliary air heater	117
9.8	Removing heater unit of Airtronic D4S auxiliary air heater from housing and installing it back in housing	119
9.9	Removing and installing exhaust pipe of Airtronic D2 auxiliary air heater	122
9.10	Removing and installing exhaust pipe of Airtronic D4S auxiliary air heater	122
9.11	Removing and installing intake connecting pipe for intake air of Airtronic D2 auxiliary air heater	123
9.12	Removing and installing intake connecting pipe for intake air of Airtronic D4S auxiliary air heater	124
9.13	Removing and installing air distribution housing of Airtronic D4S auxiliary air heater	125
9.14	Removing and installing air duct of Airtronic D4S auxiliary air heater	126
9.15	Removing Airtronic auxiliary air heaters D2 and D4S from plastic housing and installing them back in housing	126
9.16	Working principles of auxiliary heater control unit J364	128
9.17	Removing and installing auxiliary heater control unit J364	129
9.18	Removing and installing glow plug for heater Q9	130
9.19	Removing and installing flame protection mesh	132
9.20	Removing and installing flame monitor G64 and overheating sensor G189 (combination sensor)	135
9.21	Checking flame monitor G64 and overheating sensor G189	137
9.22	Removing and installing combustion air blower V6 (combination blower)	138
9.23	Removing and installing heat exchanger	141
9.24	Removing and installing combustion chamber	143
9.25	Ambient temperature sender 2 G249	146
10	Fuel supply to Airtronic auxiliary air heaters D2 and D4S	147
10.1	Safety precautions	147
10.2	Rules for cleanliness	147
10.3	Assembly overview - fuel take-off	147
10.4	Removing and installing metering pump V54	148
10.5	Removing and installing strainer of metering pump V54	151
10.6	Prerequisites for checking/measuring fuel delivery rate	151
10.7	Checking/measuring fuel delivery rate of Airtronic auxiliary air heaters D2 and D4S	151
