Contents

01	Eigendiagnose	Page
	General to self-diagnosis	**01-1**
	– Features of self-diagnosis	01-1
	– Technical data of self-diagnosis	01-3
	– Significance of EPC warning lamp (fault lamp for electronic accelerator) in dash panel insert	01-6
	– Significance of exhaust emissions warning lamp	01-8
	– Connecting fault reader	01-10
	Fault memory	**01-16**
	– Interrogating and erasing fault memory	01-16
	– Automatic test sequence	01-18
	Fault table: SAE P0 codes	**01-21**
	Fault table: SAE P1 codes	**01-34**
	Final control diagnosis	**01-59**
	– Performing final control diagnosis	01-59
	Readiness code	**01-83**
	– Reading readiness code	01-83
	– Generating readiness code	01-86
	Measured value blocks	**01-104**
	– Safety precautions	01-104
	– Read measured value block	01-104
	Evaluating measured value blocks, display groups 0...9 -Basic functions-	**01-107**
	Evaluating measured value blocks, display groups 10...29 -Ignition-	**01-120**
	Evaluating measured value blocks, display grps 30...49, 99 -Lambda regulation-	**01-131**
	Evaluating measured value blocks, display groups 50...69 -Speed regulation-	**01-150**
	Evaluating measured value blocks, display groups 70...79 -Reducing emissions-	**01-162**
	Evaluating measured block values, display groups 80...89, 100 -Readiness code-	**01-164**
	Evaluating measured block values 90...97 -Performance increase-	**01-166**
	Evaluating measured value blocks, display groups 110...119 -Charge pressure control-	**01-169**
	Evaluating measured value blocks, display groups 120...129 -Communication-	**01-175**

24	Mixture preparation, Injection	Page
	Servicing injection system	**24-1**
	– Fitting locations overview	24-1
	– General notes on injection	24-6
	– Removing and installing parts of the injection system	24-9
	– Dismantling and assembling air cleaner	24-18
	– Dismantling and assembling fuel rail with injectors	24-19
	– Safety precautions	24-21
	– Rules for cleanliness	24-23
	– Technical data	24-24
	Checking components	**24-25**
	– Checking Lambda probe heating for Lambda probe before catalyst	24-25
	– Checking Lambda probe heating for Lambda probe after catalyst	24-31
	– Checking air mass meter	24-35
	– Checking throttle valve control part	24-40
	– Checking coolant temperature sender	24-47
	– Checking intake air temperature sender	24-55
	– Checking engine speed sender	24-62
	– Checking injectors	24-65
	– Checking fuel pressure regulator and holding pressure	24-76
	– Checking intake air system for leaks (unmetered air)	24-80
	Checking functions	**24-83**
	– Idling check	24-83
	– Adapting idling speed	24-88
	– Checking Lambda probe and Lambda regulation before catalyst	24-90
	– Checking Lambda probe and Lambda regulation after catalyst	24-99
	– Checking engine operating mode	24-105
	Engine control unit	**24-109**

– Checking control unit voltage supply 24-109
– Procedure after voltage supply open circuit 24-113
– Replacing engine control unit 24-115
– Coding engine control unit 24-118
– Coding variations of engine control unit 24-121
– Adapting engine control unit to throttle valve control part 24-123
– Learning kick-down point 24-128
Checking additional signals 24-130
– Checking speed signal 24-130
– Checking signal from/to air conditioning system 24-133
– Checking signal from power steering pressure switch 24-136
– Checking driving range signal 24-140
– Checking data bus 24-142

28 Ignition system **Page**
Servicing ignition system 28-1
– General notes on ignition system 28-1
– Removing and installing parts of the ignition system 28-3
– Safety precautions 28-7
– Test data, spark plugs 28-9
– Checking Hall sender 28-10
– Checking ignition coils with output stage 28-12
– Checking knock sensor 28-17
– Check misfiring recognition 28-22
