

Contents

00 - Technical data	1
1 Safety information	1
1.1 Safety precautions when working on air conditioning systems	1
1.2 Safety measures when working on vehicles with a start/stop system	1
1.3 Safety precautions when using testing and measuring instruments during a road test	2
1.4 Safety precautions when working on the cooling system	2
1.5 Safety precautions when handling refrigerants	2
1.6 Safety precautions when working on vehicles with auxiliary/supplementary heater	3
1.7 Safety precautions when working on the SCR system	4
2 General information	6
2.1 Type plates	6
2.2 Notes concerning odours in air conditioned vehicles	6
3 Repair instructions	8
3.1 Rules for cleanliness	8
3.2 General information	8
3.3 General repair instructions	8
3.4 Contact corrosion	9
3.5 Nuts and bolts	9
3.6 Routing and attachment of lines	9
3.7 Fitting radiators and condensers	9
3.8 Working on refrigerant circuit	9
3.9 Refrigerant circuit seals	11
4 Technical data	12
4.1 Refrigerant capacity	12
4.2 Refrigerant oil capacities	12
4.3 Oil distribution	13
80 - Heating	14
1 Dismantling and assembling heater unit	14
1.1 Removing and installing motor for front Bitron blower regulation V305	15
1.2 Removing and installing sender for front Bitron blower regulation G462	16
1.3 Removing and installing intake duct	17
1.4 Removing and installing dust and pollen filter with activated charcoal filter insert	18
1.5 Function of dust and pollen filter with activated charcoal filter insert	18
1.6 Removing vents	20
1.7 Removing and installing fresh air/air recirculation flap control motor V154	21
1.8 Removing and installing heat exchanger	21
1.9 Removing and installing auxiliary air heater element Z35	24
1.10 Removing and installing circulation pump V55 for engine codes AXQ, BHX	27
1.11 Checking ventilation	27
1.12 Removing and installing air quality sensor G238	28
1.13 Principle of operation of air quality sensor G238	29
1.14 Removing and installing fresh air intake duct temperature sensor G89	30
1.15 Removing and installing ambient temperature sensor G17	31
87 - Air conditioning system	32
1 Climatronic air conditioning with automatic regulation	32
1.1 Procedure when checking and adjusting components	32
1.2 Function of operating and display unit for Climatronic air conditioning system E87 with air conditioning system control unit J301	33
1.3 Function of operating and display unit for Climatronic air conditioning system E87 "2-C" with Climatronic control unit J255	34

1.4	Function of operating and display unit for Climatronic air conditioning system E87 "4-C" with Climatronic control unit J255	36
1.5	Function of rear Climatronic operating and display unit E265 , "4-C" only	39
1.6	Overview - Climatronic components	40
1.7	Checking condensate drain hose with valve	41
1.8	Removing and installing high-pressure sender G65	41
2	Components for front control and regulation of manual air conditioning system, Climatronic 2-C and Climatronic 4-C	44
2.1	Manual air conditioning system - passenger compartment	46
2.2	Removing and installing manual air conditioning system and Climatronic control unit J255	47
2.3	Removing and installing sunlight penetration photosensor G107 or sunlight penetration photosensor 2 G134	47
2.4	Removing and installing roof temperature switch G86	48
2.5	Climatronic - passenger compartment	49
2.6	Removing and installing right footwell vent temperature sender G262	50
2.7	Removing and installing left footwell vent temperature sender G261	50
2.8	Removing and installing front right chest vent temperature sensor G386	51
2.9	Removing and installing front left chest vent temperature sensor G385	51
2.10	Removing and installing evaporator temperature sensor G308 or evaporator output temperature sender G263	51
2.11	Renewing control motors on heater and air conditioner unit	52
2.12	Overview of control motors on heater and air conditioner unit	52
2.13	Removing and installing defroster flap control motor V107 , vehicles with "2-C" and "4-C" Climatronic	56
2.14	Removing and installing left side vent control motor V299 , "4-C" Climatronic or side vent control motor V262 , "2-C" Climatronic	58
2.15	Removing and installing left centre vent control motor V110 , "4-C" Climatronic or centre vent control motor V102 , "2-C" Climatronic	59
2.16	Removing and installing left temperature flap control motor V158	59
2.17	Removing and installing left footwell flap control motor V108 , "4-C" Climatronic or footwell flap control motor V261 , "2-C" Climatronic	60
2.18	Removing and installing right temperature flap control motor V159	60
2.19	Removing and installing right footwell flap control motor V109 and right temperature flap control motor V159	61
2.20	Removing and installing right centre vent control motor V111 and right side vent control motor V300	63
2.21	Removing and installing defroster flap control motor V107 or front air distribution control motor V145 for vehicles with manual air conditioning system	64
2.22	Removing and installing footwell flap control motor V261 or temperature flap control motor V68 for vehicles with manual air conditioning system	65
2.23	Removing and installing high-pressure sender G65	66
2.24	Removing and installing air duct in centre console, Climatronic "2-C"	68
3	Components for control and regulation of Climatronic "4-C", rear (2nd heater and air conditioner unit)	69
3.1	Removing rear Climatronic operating and display unit E265	69
3.2	Components and air duct for Climatronic air conditioning system "4-C"	70
3.3	Moving 2nd heater and air conditioner unit, rear to service position	73
3.4	Removing and installing rear left air quantity flap control motor V239	74
3.5	Removing and installing rear right air quantity flap control motor V240	75
3.6	Removing and installing rear left temperature flap control motor V313	75
3.7	Removing and installing rear right temperature flap control motor V314	76
3.8	Removing and installing rear left vent temperature sender G405	76
3.9	Removing and installing rear right vent temperature sender G406	77
3.10	Removing and installing motor for rear Bitron blower regulation V306	77
3.11	Removing and installing rear blower regulation sender G463	78
3.12	Checking rear condensation drain hose with valve	78
3.13	Removing and installing heat exchanger with rear heater and air conditioner unit installed	78

4	Air conditioner compressor	81
4.1	Loosening and tightening input shaft of air conditioner compressor	81
4.2	Removing and installing input shaft of air conditioner compressor	82
4.3	Removing and installing drive plate with overload protection	82
4.4	Checking and adjusting true running of drive plate with overload protection	83
4.5	Unbolting drive plate from and bolting onto air conditioner compressor	83
4.6	Conversion from Hardy disc to Gates coupling	85
4.7	Removing and installing mounting with freewheel on air conditioner compressor	86
5	Repair work on refrigerant circuit which may be performed only in appropriate workshops by specially trained mechanics	90
5.1	Required special tools, workshop equipment, testers, measuring instruments and auxiliary items	91
5.2	Repairing refrigerant circuit components in engine compartment (2-C / 4-C)	92
5.3	Removing and installing air conditioner compressor and ancillary bracket: engine codes AXQ, BHX	93
5.4	Removing and installing air conditioner compressor with ancillary bracket: engine codes AZZ, BAA, BHK, BHL, BKJ, BMV, BMX and BRJ	95
5.5	Removing and installing air conditioner compressor, engine code BAR	98
5.6	Removing and installing air conditioner compressor with ancillary bracket: engine codes BKS, BUN, CASA, CASB, CASC and CATA	102
5.7	Removing and installing air conditioner compressor: engine code AYH, BKW, BLE and CBWA	105
5.8	Removing and installing air conditioner compressor with ancillary bracket: engine code BAC, BLK, BPE and BPD	107
5.9	Removing and installing air conditioner compressor with ancillary bracket: engine code BJN	110
5.10	Removing and installing evacuating and charging valves, low-pressure side	113
5.11	Removing and installing evacuating and charging valves, high-pressure side	115
5.12	Removing dryer cartridge	116
5.13	Checking high-pressure safety valve on air conditioner compressor	118
5.14	Notes on installing air conditioner compressor	119
5.15	Removing and installing refrigerant temperature sender G454	121
5.16	Removing and installing expansion valve	122
5.17	Removing and installing rear expansion valve	123
5.18	Removing and installing condenser	124
5.19	Removing and installing heater and air conditioning unit	126
5.20	Dismantling and assembling heater and air conditioning unit	127
5.21	Removing and installing evaporator	129
5.22	Repairing components of refrigerant circuit of 2nd heater and air conditioning unit "4-C"	130
5.23	Removing and installing 2nd heater and air conditioning unit at rear	132
5.24	Dismantling and assembling 2nd heater and air conditioning unit	136
5.25	Removing and installing evaporator with heater and air conditioner unit installed	137
